EXPERIENCE

Wild Ones, Neenah, WI — Web Developer/IT Manager

June 2020 - Present

Leveraged industry experience to increase members by 300% by implementing third-party partnerships to reduce costs and increase profits. Modernized systems by transitioning from AccessDB to an online WordPress member system. Increased security and reduced manual inefficiencies.

- Designed, optimized, and managed advanced reports for staff and chapter leaders. Created automated processes to eliminate manual onboarding processes.
- Managed over 120 WordPress sites with over 190 editors, running in a WP multisite environment.
- Built a custom search knowledgebase for internal users, which led to a 75 percent decrease in support tickets.
- Created, implemented, and maintained SOPs for PII/PCI/CAN-SPAM compliance.
- Solely responsible for leading IT infrastructure projects, including buying and configuring staff laptops, landline phone migration to Microsoft Teams, and a web server migration. Created a custom MySQL backup solution to prevent data loss.

Adam's Specialty Products, Neenah, WI — WooCommerce Developer

June 2020 - January 2022

Migrated several sites from Magento to WooCommerce, including updating custom aquarium configurators.

- Created and managed company websites with a primary focus on developing custom plugins and themes for WordPress.
- Updated website pages and product information to ensure current and accurate content.
- Identified and resolved bugs and errors reported by users and team members, ensuring smooth website functionality and user experience.

Fox World Travel, Oshkosh, WI — PHP Web Application Developer

October 2013 - June 2020

Implemented extensive additions to corporate intranet and public-facing websites, enhancing functionality and user experience. Automated business processes. Updated and modernized legacy code to maintain a clean and efficient codebase.

- Ensured compliance with security standards such as PCI, PII, and CCPA.
- Utilized services like Twilio, Slack, and SMTP to create alerts for employees and customers.
- Wrote highly efficient queries for MySQL, SQL Server, Sybase, and Interbase databases.
- Employed AWS services, including S3 and DynamoDB, to ensure uptime and fast response times.
- Managed and maintained RHEL and IIS servers in Azure.

Blue Door Consulting, Oshkosh, WI — PHP Programmer

June 2012 - October 2013

Built websites, social networks, and web applications for a diverse clientele.

- Engaged primarily in programming tasks, working closely with internal teams to develop specifications and implement best practices.
- Made informed recommendations on the use of existing and emerging technologies to enhance project outcomes.
- Involved in various aspects of development, including programming, graphic design, and database development.
